**Policy Document on Green, Clean and
Plastic Free Campus.**

Policy Document On Clean, Green and Plastic Free Campus

Introduction:

Colleges and Universities have wide-ranging impact on the world in the region of them, both negative and positive. Colleges are also in a unique position as educational institutions to be leaders in pursuing environmentally sustainable solutions. Indira Gandhi (Sr.) College expresses its promises to sustainability in many ways. It has taken a number of positive steps to reduce its adverse environmental impact. But many areas remain in which substantial improvements can be made. College have many activities and to make recommendations for improving the College's environmental sustainability.

For Clean and Green Campus Policy is focused on the Plantation, Solid Waste Generation and Recycling, *Roof Water Harvesting*, Campus Energy power, Overall Environmental Awareness these are used as indicators . For each indicator, we establish a Goal and benchmark to evaluate the College overall performance. There is continuously monitoring by committee and faculties to take appropriate measures for its improvement.

Composition of Committee

1. Principal of the college- Chairperson
2. IQAC Coordinator- Secretary
3. Faculty Representative- Head, Department of Environmental Science
4. NSS coordinator
5. Non-Teaching Staff Representative- Office Superintendent

1.Plantation:

Goal : Ensure the quality of the indoor environment, to promote preservation and restoration of natural areas, to educate students about the process and the importance of these activities.

Benchmark:

- Select plants with low maintenance requirements and that otherwise fit the local ecosystem (i.e. non-invasive and provide habitat for native species).
- Policies ensure that development minimizes the use of impermeable surfaces such as parking spaces and landscaping in order to reduce impacts on storm water quantity and quality.

Performance:

A campus is beautifully designed with gardening at the entrance of the college. The entrance space is skillfully covered with lawn and collection of flowering and medicinal plants, herbs, and some tree plants are also cultivated in the campus. Our plan is to cover the spaces with more trees in near future. We are very fortunate because we have enough space to cultivate more trees in college.

2.Campus Energy power

Goal: To encourage efficient energy use and production of renewable energy

Benchmark:

- Total consumption of energy for College office, Laboratories, Library, and Play ground etc. does not Exceed 700-800 Unit per month.
- A percentage of energy purchased and/or produced from renewable sources i.e. solar power.
- Future plans for setting and attaining a higher percentage.

Performance:

The consumption of energy in institute is compared with previous years consumption to check the efforts (precautions) taken by the cell are working or not?

- + College has planned to use Non-conventional sources of energy in the campus to save the use of conventional sources of energy i.e. reduction in electricity. This is literally proved the best alternative source for the conservation of energy.
- + We are also planning to use this solar energy for office and library in future. The notice placed near the switch boards: prevent wastage of energy.
- + The use of electricity CFL lamps in the college office, class rooms and laboratories
- + Computers and other equipments are put on power-saving mode.

3) Solid Waste Generation and Recycling

Goal: Minimize the impacts of solid waste use by improving the Environmental characteristics and by lowering total use.

Benchmark:

- There should be in place a policy for the handling and disposal of solid waste and hazardous materials.
- Determine the solid waste management infrastructure in campus.

Performance:

Nearly everything humans do leaves behind some kind of waste. Indira Gandhi (Sr.) College also generates a variety of wastes, from municipal solid wastes, to electronic wastes, institutional waste to landscape wastes. The college does a good job of ensuring that hazardous materials are disposed of properly, and over the years has increased its use of environmental friendly. So the college has given its top priority to dispose of the waste material in scientific manner. Chemical and biological waste generated from chemistry and biological departments is separately sorted and the biological waste is dumped in pit, whereas chemical waste is disposed of separately to avoid health hazards

4) Plastic Free Campus

Goal: To Reducing the single-use of plastic to an almost zero level so that they should not be dumped under the ground with wastes

Benchmark:

- Strict ban on single –use plates, thermocol, cups, glasses, wrappers etc.
- No use of plastic or PVC banner less than 100-micron thickness.

Plastic waste exposed to the environment creates problems and is of significant concern for all life forms. Plastic production and accumulation in the natural environment are occurring at an unprecedented rate due to indiscriminate use, inadequate recycling, and deposits in landfills. Government has decided to take plastic ban as a national level campaign to address the environmental hazards being caused by the indiscriminate use of plastic, So it is becoming a key responsibility of every citizen of our country not just to “Say No to Plastics” but also to create awareness among the community as whole to stop this pollution and leave behind a green and pollution free place for our future generations. In this response, Indira Gandhi (Sr.) college has made policy that, solid waste material never burnt in the campus instead it is collected and sorted the biodegradable material from the non-degradable. The production of non-degradable material is very negligible because

- We educate the students not to use plastic bags, carry bags at least in the campus, result the production is negligible
- We aware the students about the harmful impacts of single use plastics
- We ban the usage of plastics in the institution's premises .
- We provide R.O. water points to avoid the purchase and use of plastic water bottles.
- Informed about alternative solutions like cloth bags, paper bags etc.

5) Roof Water Harvesting

Goal: Experience efficient water use and encourage.

Benchmark:

- Water use does not exceed 50 liter per day/ person in campus.
- The campus has complete and clear records of its water use, and there exists a regular, on-going reporting process.
- The campus facilities department provides information to campus users about water use in ways that raise awareness and facilitate action.

Performance:

The institution has enacted the projects of Roof water harvesting. The project of roof water harvesting is in operation. It is setup in the campus at newly constructed building for library it was found suitable for implementation of this practice. Building is constructed at the south side of the campus. Rain water which precipitates on roof is collected through pipes and filtered it in pit. The size of the pit is 5x4x3 feet for filtration we have used sand particles, small rock pieces, cinder pieces etc. with two layers each.

6) Environmental Studies Curriculum

Goal: Create an atmosphere of awareness and sense of responsibility on campus regarding environmental issues. Engage students, faculty, staff and administration in cooperative analysis and response to these issues.

Benchmark:

- Develop a clear assessment of the environmental studies curriculum and work from this analysis to achieve goals recommended by faculty, students, and administration
- Environmental studies is an increasingly significant area of study in institutions of higher education.

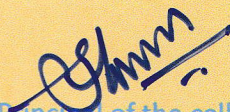

Performance:

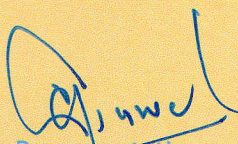

The Environmental Studies Program provides an academic forum for information and analysis of environmental issues. Studies thus plays a highly significant role in increasing in-depth student understanding of such issues and thereby increasing overall campus awareness. Environmental Studies' emphasis on leads to numerous student projects advancing the College's environmental knowledge and practices. The faculties of Environmental Science interact with of students, faculty, staff, and administration.

Most students and faculty involved in the Environmental program are exceptionally enthusiastic about it. Some of the most applauded aspects of the Environmental Science department include its strongly interdisciplinary nature.

The high priority work:

- Improve the College's monitoring and reporting of water and energy usage and provide better feedback and information to campus users. Continue working towards composting the post-consumer food waste generated in the campus.
- Continue working to collect and use for composting the amount of leaf fall and sprayed on campus ground.
- Communicate with computer and other hardware suppliers to find out what materials they can take back themselves
- Properly dispose of chemical materials that may contain hazardous chemicals.
- With regards to the concerns mentioned in this report, the College should consider adopting specific goals and targets in its pursuit of sustainability.
- To identify existing efforts to make the College a more environmentally sustainable institution .
- To identify all programs and activities that college is engaged in to reduce, reuse and recycle the materials and resources we use as a campus community .

Office Order

Following faculties are hereby directed to take all that necessary steps to make college Clean and Green. With NSS unit of college, organize various events or programmes and aware the students about Environmental Sustainability. Through “Swacchata Abhiyan Policy” take initiative for Clean, Green, Safe, and maintain Environment harmony in campus. This committee will remain active till the next order.

Take initiative for following work to maintain Environment harmony in campus

1. Cleanliness of Campus area
2. Tobacco free campus
3. Plastic free campus
4. Measures for Water conservation
5. Measures for saving electricity
6. Tree plantation

Certificate

This is to certify that Shri Sharda Bhavan Education Society's "Indira Gandhi (Sr.) College, CIDCO, Nanded" has conducted Energy Audit, Environment Audit and Green Audit in the academic year 2021 - 2022 to assess the green initiative planning, efforts, activities, implemented in the college campus like Plantation, Waste Management, Rain Water Harvesting, Plastic ban, Conservation of Energy, Energy Management and various Environmental Awareness activities. Sabs India Sales Corporation has verified campus data of "Indira Gandhi (Sr.) College, CIDCO, Nanded".

This Energy Audit, Environment Audit and Green Audit are also aimed to assess impact of green initiatives for maintenance of the campus eco-friendly.

Mr. Sanjay Singh
